

# Changing package name of flutter app

It is assumed that you have successfully imported the flutter project to your system. Now in order to change package name of your application open up the android studio terminal and paste this command  
flutter pub run `change_app_package_name:main` `com.new.package.name`

or

flutter pub run `change_app_package_name:main` `com`.`[your package name here]`

```
E:\0 Code Infosys\food ex demo\appcode>flutter pub run change_app_package_name:main com.template.foodexplorer
Old Package Name: com.template.foodexplorer
Updating build.gradle File
Updating Main Manifest file
Updating Debug Manifest file
Updating Profile Manifest file
Project is using Java
Updating MainActivity.java
Creating New Directory Structure
Deleting old directories

E:\0 Code Infosys\food ex demo\appcode>
```

Package name of your flutter app will be updated successfully
